Experiences

Jul'21–Now	Working as Web Developer at Unified Solutions.
Mar'19–May'22	Web Application Developer (Codeigniter/Laravel) at Code Aristos.
Mar'20–Dec'20	Remote Web Developer at Getonnet AB Sweden.
Dec'20–Nov'21	Remote Laravel Developer at OnScreen Designs Australia.

Projects

Jul'21–Oct'21 **Tag Finder Web Portal:** Developed a lost tag management system for an Australian startup. When a user finds a tag that was lost he will register it into the system and the system will automatically find the owner of the tag and send an SMS and email to the owner. I used Twilio and Mailgun API for SMS and Email notifications. I used Laravel 8 to develop this web portal.

my.idtags.com.au

Jul'21–Oct'21 **GHL API Based Marketing Platform:** I developed a marketing platform using Go High-Level API. The tasks of this platform are to search for clients from the GHL database, add reward coins for a customer, add new customers into the GHL database, creating new agencies, locations. I used the Laravel framework to develop this web application also used Google places API to auto-complete an address.

app.rewards-plus.io

Mar'21–Apr'21 **Tattoo Store Management System:** This is a web application developed using Laravel Framework. This application manages appointments, procedures, and payments for a Tattoo Shop. Users create or send a request to the Admin/Manager. When Admin/Manager confirms the request by assigning staff with it user gets a deposit link to his/her email. Then he/she confirmed that appointment by paying the initial deposit.

test.prasunnandy.me

Apr'21–May'21 **Investor Portal:** This is a Laravel based investor portal. Here admin will update master option PnL (Profit and Loss) of investment for each day and then the system calculates all the calculations by itself.
